

ULTIMATE SETTING POWDER

Triple-milled micro-pulverized mineral powder

PRODUCT HIGHLIGHTS

- Clump and oil free
- Functions as an antiperspirant under high-heat settings
- Available in six translucent colors

One of the finest setting formulas available, our Ultraluculent Loose Powder sets any cream makeup without caking. The superfine mineral powder effortlessly glides on and works into crevices to reduce the appearance of fine lines and wrinkles. Preferred by many of the world's leading professional makeup artists, this luxurious micro-pulverized finisher is clump-free for easy application and all-day wear. The colorless formula will not alter foundation tone. With proper use, container should allow for many applications.

For best results, dip Cinema Secrets Professional Powder Puff into small amount of powder. Fold puff in half like a taco and rub halves together (as if rubbing out a stain) to work powder throughout puff. Roll or pat onto foundation and press to work powder into foundation. Finish by brushing away excess powder and spraying with Cinema Secrets Moisture Spray to absorb any residue.
