

SUPER SEALER

Matte moisture-and-perspiration-resistant makeup sealer

PRODUCT HIGHLIGHTS

- Use under makeup as antiperspirant for high-heat, high-humidity, or industrial-lighting environments
- Use over makeup to protect against the elements and eliminate shine
- Prevents rub-off on clothing
- Creates a sealing formula by using in place of water with water-soluble foundations

Cinema Secrets Super Sealer is used to seal makeup for extended wear and long-lasting freshness. The matte formulation holds makeup in place and creates a protective shield against moisture, outdoor humidity, and other elements—yet allows the skin to breathe. Super Sealer can also be used daily as a moisture inhibitor when applied before foundation, moisturizer, or skin primer.

To use as a sweat inhibitor, spray two light coats on skin before applying moisturizer or primer. This thin layer will create a barrier between your skin and your makeup to keep the makeup from smudging off.

To use as a sealant, spray a light mist over entire face after you have completed your makeup. Allow to dry for a minute and repeat if full waterproof effect is desired. Easily remove with cleanser and water.
